

You're already on SchoolCash Online. Here's what Lunchbox adds.

Lunchbox is built by KEV Group and connects directly to your school's Student Information System (SIS), so class lists and student data sync automatically — nothing to re-enter, nothing to maintain by hand.

Already trusted

Built by KEV Group, the company behind SchoolCash Online.

Synced with your SIS

Student and class data flow in automatically — no re-entry.

Fast to launch

Most schools are up and running in days, not weeks.

Free to activate

No cost, no contract, no procurement process.

\$0

setup cost

Days

not weeks to launch

1

login parents already know

15 min

quick setup call

Getting started is simple

1

Quick intro call

15 minutes, no paperwork, no new contract to sign.

2

We connect your SIS

Class lists and student data sync in automatically.

3

Go live in days

Parents start ordering — staff stop chasing paper forms.

What changes

- Parents order and pay for lunch online — no more cash or paper forms.
- Staff stop manually tracking and tallying orders.
- Vendors get organized daily reporting instead of sorting forms by hand.

What stays the same

- Fundraising still flows back to the school.
- Your school's SCO account and parent familiarity carry over.
- No new login — for staff or for parents.

"One of the best things that happened in our school after SchoolCash Online was going live with Lunchbox. Parents are happy, kids are looking forward to having lunch at school, and teachers have more time to focus on what they do best — teaching."

— Parent Council Volunteer

How does Lunchbox connect to our SIS?

It integrates directly — class lists and student data sync automatically, no manual entry.

What does it take to get started?

One 15-minute call. No paperwork, no new contract, no procurement process.

How long does activation take?

Most schools are fully live in days, not weeks.

Does fundraising still work the same?

Yes — proceeds continue flowing back to your school.
